

Brady Workstation

Simple. Efficient. Flexible.

Brady Workstation

Get more done faster with simple labelling software apps.

The latest in label creation software, Brady Workstation has revolutionised how you design and print labels and signs. Simply pick the apps you need to get the job done, and enjoy the benefits of simple, efficient and flexible label creation.

Simple.

Brady Workstation offers an intuitive user interface and workflow so that you're ready to get started, without needing in-depth training. Download Brady Workstation at Workstation.BradyID.com, find the apps you want, and you're ready to create labels and print them on your Brady printer.

Efficient.

Each app is designed with you in mind, featuring built-in regulations, standards, pictograms, common phrases, data importation guidance, help functions and more. That means you can create signs, pipe markers, lockout procedures, labels and more – with time to spare for the other tasks on your list.

Flexible.

With over 20 app and suite options, and more continually being developed, you have the tools you need to create labels for nearly any application. Fill out your workstation to align with your exact needs by downloading the apps you need and leaving out the ones you don't.

Brady Workstation Suites

Get the right suite of labelling solutions for your application needs:

	Part No.	Automation Suite
	149187	<p>Get the power to fully automate your label printing with the Brady Workstation Automation Suite. After a few easy setup and template creation steps, you're ready for automated label printing - helping to eliminate errors and ensure label layout and format consistency.</p> <p>Apps included: Custom Designer, Data Automation, Manage Files, Template Editor and Label Settings.</p>
		Basic Design Suite
	FREE	<p>Get everything you need to create your own custom labels with the Brady Workstation Basic Design Suite. With basic design, formatting, graphics and simple barcode libraries, you can design labels like a pro in no time.</p> <p>Apps included: Batch Print, Excel Import, Manage Files, Sequence, Template Editor, Label Settings and Custom Designer Lite.</p>
		LabelMark Upgrade Suite
	149193	<p>When you're ready to step up to Brady Workstation from LabelMark software, the LabelMark Upgrade collection of apps includes everything you need for the transition. You can design basic text labels or labels with advanced formatting, add graphics and barcodes, serialise and import data, and more.</p> <p>Apps included: Advanced Import, Advanced Sequence, Batch Print, Custom Designer, Excel Import, Flip Flop, Manage Files, Print Partner, Sequence, Template Editor, Text Labels and Label Settings.</p>
		Print Partner Suite
	148144	<p>Print Partner Suite includes everything you need to fill in your templates and print, including importing data from a variety of supported data sources or automatically generating sequential data for your labels.</p> <p>Apps included: Advanced Import, Advanced Sequence, Excel Import, Manage Files, Print Partner and Sequence.</p>
		Product & Wire Identification Suite
	149191	<p>When you need to create product identification and wire marking labels, the Product and Wire Identification Suite is your go-to solution. It allows you to create basic text labels or labels with graphics and custom formatting, and serialise and import data. If you need to create labels for your product or wires and cables, this is the suite for you!</p> <p>Apps included: Advanced Import, Advanced Sequence, Asset Tags, Batch Print, Custom Designer, Excel Import, Flip Flop, Label Settings, Manage Files, Patch Panel, Print Partner, Sequence, Template Editor, Terminal Block and Text Labels.</p>
		Safety & Facility Identification Suite
	877870	<p>Keep your facility safe and compliant with the Safety & Facility Identification Suite. This group of apps makes it easy to create custom signs, labels and pipemarkers. If you are looking to add visual safety guidance to your facility, this is the suite for you!</p> <p>Apps included: Arrow Tape, Batch Print, Custom Designer, Excel Import, Express Signs, Label Settings, Lean Visuals, Manage Files, Pipemarker, Print Partner, Sequence and Template Editor.</p>
		Scan and Print Suite
	149445	<p>This suite allows you to consume data from a barcode scanner, keyboard and/or custom script to quickly populate your label templates as part of a labeling workflow.</p> <p>Apps included: Scan and Print, Custom Designer, Text Labels, Template Editor, Manage Files, Label Settings, Network Printers</p>
		Laboratory Identification Suite
	150498	<p>Ensure labels for all your lab samples and equipment are crisp, clear, readable and contain all necessary information. Easily design and create labels for your cryovials, centrifuge tubes, bottles, conicals, slides and other samples in your laboratory.</p> <p>Apps included: Custom Designer, Sequence, Excel Import, Advanced Import, Template Editor, Advanced Sequence, Batch Print, Manage Files, Print Partner, Label Settings, Network Printers</p>

Brady Workstation Apps

Find what you need to get your labelling job done quickly and effectively:

	Part No.	GHS Labels
	145449	Creating GHS labels is now surprisingly simple. We've streamlined the process so you can easily enter the data from your SDS sheets once, then create and print any size GHS label at any time. Need Bi-lingual labels? Those are also supported in the app.
	Lockout Writer	
	145445	Save time and keep employees safe with the Lockout Writer app. This intuitive tool allows you to create, store and print simple lockout procedures, associated tags and energy source labels quickly and easily.
	Custom Designer	
	149195	When you need full label creation capabilities to streamline your work and maximize your investment, Custom Designer is the app of choice. This premier label editing app includes all of the features of Custom Designer Lite, plus more barcodes, linked objects, label error checking, subscript/superscript, advanced editing tools and more. It also opens saved "graphics mode" files from LabelMark 5 and 6 without the need to convert.
	Print Ruler	
	FREE	Print a simple ruler that you can apply when and where you need it. "Brady Labs" are experimental apps or features not ready for full release. Test them out for us, then let us know what you think!
	Excel Import	
	FREE	The Excel Import add-on module lets you import Excel data onto your labels, creating a separate label for each row in your spreadsheet. It supports both .xls and .xlsx formats, and works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.
	Arc Flash	
	FREE	Quickly and easily create NFPA compliant arc flash labels with the Arc Flash app. Enter or import the assessment data for your equipment, then use the built-in templates to create and print your labels within a few simple clicks. This includes the latest 2015 updates to the NFPA 70E standard.
	Sequence	
	FREE	With the Sequence add-on module, you can create a separate label for each value in a numeric or alphanumeric sequence. The sequence is defined by setting the starting number, total number of labels and increment interval. It works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.
	Template Editor	
	FREE	For more consistent, accurate labels, the Template Editor add-on module available in Custom Designer, Custom Designer Lite, and Text Labels editor apps allows you to set elements on your labels to be editable or locked. Once completed, your finished templates can be used in Print Partner or Data Automation apps to easily enter data onto your labels.
	Batch Print	
	FREE	The Batch Print app is your one-stop shop for grouping files to print together. By batching similar files together to print as one job, you can save ribbon and tape materials. And if you need to print the same files again and again, you can save your jobs for faster reprints.
	Label Settings	
	FREE	Save time and reduce errors by setting default horizontal and vertical printing adjustments when using specific label supplies with a specific printer. The Label Settings app also allows you to define custom label supplies for use with Brady Workstation, similar to the "Custom Parts" feature in LabelMark.
	Manage Files	
	FREE	Need to see and organise your label files from all of your apps in one place? The Manage Files app lets you manage all of your saved files from one screen, with options to preview, categorise and delete your files without going into each app separately.
	LabelMark 4 Converter	
	FREE	Do you have LabelMark 4 files? The LabelMark 4 Converter does just what it says - converts your files for use in Brady Workstation. You can convert a single file or all files in a single folder at once. (You do NOT need this utility for files from LabelMark 5 or 6, as these files can be directly opened within Custom Designer, Custom Designer Pro or Text Labels without needing to convert).
