

# Heavy Duty Water Filled Barrier

## Features

- Complies to AS1742.3
- Water filled barriers can be used in low speed situations where you need to separate people or vehicles from potential dangerous situations
- The heavy duty water filled barriers are **Australian made**, with superior quality, durability and flexibility
- Water ballasted for safety, tough UV stabilised polyethylene, semi-retractable hinge pin, drainage plugs, easy to stack, manoeuvre and install
- For use at construction sites, heavy civil sites, low speed zone areas <40km/h\*, car parks, road closures, airports, pedestrian delineation, crowd control, events and sporting activities, general delineation
- Hinge pin allows joining barriers to rotate at 90 degree angles
- NOT CRASH TESTED/RATED
- ADDITIONAL FREIGHT CHARGES MAY APPLY FOR BULKY ITEMS & BULK QUANTITIES. Contact us for details.

\*The above information is for reference only. The selection of a barrier is ultimately the customers responsibility and we advise checking with your relevant local, state and national regulatory bodies to ensure that you are using the correct product for the correct application. Brady takes no responsibility for the incorrect selection and use of barriers.
