## TAGLOCK™ Circuit Breaker Securing Device

With Brady's TAGLOCK™ circuit breaker securing devices, your maintenance team members can individually tag and secure each circuit breaker for improved safety and compliance. These devices are secured to circuit breakers with standard non-releasable 22-kilo minimum strength nylon cable ties.

### TAGLOCK securing devices feature:

- ▶ **Easy installation** onto the breaker with nylon cable tie and the worker's ID tag
- ▶ **Multiple worker tagging capabilities** for up to 4 workers to apply a nylon cable tie and their ID tag
- ▶ **Secure restraints** that will remain securely fastened to the breaker switch until each person has removed their nylon cable tie and tag
- ▶ **Pre-loadable tags** enable users to prepare ID tags in advance and then quickly secure them to the designated energy control lockout points
- ▶ **More convenient lockout tagout option** eliminates the need to use locks
- ▶ **Cost savings** when it comes to tag preparation and reduced equipment downtime

## Comprehensive Lockout Tagout

When properly attached and secured to an energy-isolating circuit breaker, TAGLOCK lockout devices provide a positive restraint to hold the breaker switch in the safe de-energised position. All lockout tagout products, including TAGLOCK devices, should always be recognised and used in accordance with a comprehensive documented lockout tagout program that includes the use of controls, thorough lockout procedures and careful training, combined with the assurance of employee accountability.

Securable by both cable ties and safety lock.
